SPECIAL LIST

Azalea and Rhododendron Seeds

Foreword

For terms and conditions please see our general Tree and Seed Catalogue. Copies sent on request.

Seeds of many rare items of this list can be supplied in small quantities only. We reserve the right to reduce the amount ordered in accordance with quantities on hand.

We shall be glad to answer to the best of our ability, inquiries regarding description, origin, hardiness, etc., of the plants listed herein. While we prefer to list rare items in 1000 seed lots, we find it necessary to offer them in packets as well. These will contain a reasonable quantity of seeds, sufficient to start a fair amount of seedlings.

In cases where items cannot be filled this season, we ask your permission to hold orders until a new supply is received next season.
